In 1958 my mother first used herbs to treat clients in her cosmetic clinic for a variety of skin disorders. Her pioneering work was followed by years of research, practical experimentation and scientific investigation. This prolonged effort has resulted in a unique blend of herbal know-how combined with state of the art cosmetic chemistry.

I am proud to continue the tradition started by my mother. Our aim is to provide you with unparalleled results for a variety of skin conditions. Over 50 years of experience with Herbal Aktiv Peel® in many countries has given us great confidence in the results and safety of this professional skin treatment.

Yours sincerely,

Katharina Dierel
